About

Full-stack developer (ReactJS, TypeScript)

Specialty: ReactJS-Redux, toolkit, node.js, TypeScript

Programming languages: JavaScript (ES6), TypeScript

Hardworking and passionate full-stack developer. **Pedantry, determination** and **commitment in every project** are my main strengths.

I took a part in private as well as commercial projects. Below you can see several of them.

I am looking forward to become a part of your team 😊

Skills

▼ Hard

JavaScript (ES6), TypeScript, webpack, babel, ReactJS (with Redux, toolkit, typescript), Next.js, Node.js, CSS (SASS), HTML, MongoDB, Git, SPA, SSR, Responsive Web Design

▼ Soft

Communication, Self-motivation, Responsibility, Problem solving, Decisiveness, Ability to work under pressure and Time Management, Flexibility

▼ Tools

WebStorm, React DevTools, Redux DevTools, VScode, PostMan, Jira, Trello, Notion, Gitlab, Github

Projects

▼ Gen-Art

Landing and online store of handmade pictures made with String Art technique. The application is service for viewing and ordering pictures. Admin panel also was designed. It can be used by application administrator for pages content changes and orders and reviews controlling. Administrator authentication was implemented with json web token technique.

Position: Full-stack developer (Solo)

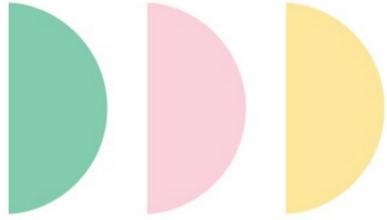

▼ Tech stack

- *Client:* Next.js, Redux-ToolKit (advanced TypeScript)
- *Backend:* Node.js, express (TypeScript), REST API

Integration: Robokassa, SDEK, Russian post, Yandex metrika

Implementation period: March 2021 - July 2022

▼ Surdoclass

This application is a database of paid and free courses, divided into video lessons with sign language translation; buying and viewing courses is available only to authorized users in the system.

It is possible to maintain a personal profile (personal data and avatar). Some profile data is used in the recommendations block (see below).

There is a system for commenting lessons/courses. (The application is waiting realise)

Position: Frontend developer (Solo)

Tech stack: Next.js, Redux-ToolKit (advanced TypeScript)

Integration: Robokassa

Implementation period: March 2021 - June 2022

▼ Skillmaps

A service that allows you to create a personal competency card in the field of IT (programming) and subsequently generate a CV.

A choice of specializations and skills in them are provided. in this way, the user can visually assess his development progress in the field of IT (for this, a progress bar has been implemented that displays the progress of filling with the skills of a particular specialization)

Position: Full-stack developer (Team)

▼ Tech stack

- *Client:* Next.js, Redux-ToolKit (advanced TypeScript)
- *Backend:* Node.js, express, REST API

Integration: Yandex metrika

Implementation period: June 2021 - now

▼ PWC

Service for the sale of educational courses in the field of management, consulting, etc. Users are both potential buyers and companies that advertise and sell courses.

Position: Frontend developer (Team)

Tech stack: ReactJS, HTML, JQuery, SCSS

Integration: Yandex metrika

Implementation period: June 2021 - now

Education

▼ Condensed Matter Physic (2017 - 2021)

Bachelor, UrFU, Yekaterinburg

September 2017 - July 2021

Acquirements: abstract thinking, modeling problem solving processes, big data processing, identifying patterns (**python, numpy, scipy, pandas**)

▼ Mechatronics and Robotics (2014 - 2017)

Bachelor(*incomplete HE*), UrFU, Yekaterinburg

September 2014 - July 2017

Acquirements: **Arduino** controller boards programming, **Siemens** controllers programming

Work experience

▼ Fullstack developer React (2021-now)

Анмедио (Mechanica)

December 2021 - now

Responsibilities: react-components design, new features implementation, bug fix, legacy code rewriting to code, which meet new standards (class components → functional ones with hooks)

Projects: educational platform of PWC, СберСпасибо, online-store РусВинил

Acquirements: **React, Redux toolkit, Apxhitmekmura, Git, legacy code understanding**

▼ Frontend developer React (2021-2021)

eTag

May 2021 - November 2021

Responsibilities: react-components design (redux toolkit, typescript). Selenium- и unit- testing.

Acquirements: **React, Redux toolkit, MySQL, Selenium, Program architecture**

▼ Lab assistant (2019-2021)

UrFU, Nanotechnologies Department, Magnetism Department

September 2019 - May 2021

Responsibility: Scientific problems solving. Data processing automatization (experimental data) using python. Scientific articles writing.

Developed skills: *Python, Numpy, Math modeling, Machine learning, Keras, TensorFlow, Pandas*

Hobbies

Neural Networks: Neural networks designing using Keras and TensorFlow.

Language

Russian: Native

English: B2, Technical English: documentation reading, correspondence, commenting

German: entry
